

Purchase Order Distribution

Collaborate for success

OOCL Logistics has demonstrated its leadership in information technology and innovative solutions with the launch of Purchase Order Distribution.

This unique product helps you improve efficiency and offers total visibility in all communication between parties involved in the purchase order. The product supports suppliers manufactures, and other parties such as trading agents and logistics service providers.

Purchase Order Distribution helps you minimize your costs for most purchase order management works, from order creation, dispatch, distribution tracking, and housekeeping to data reports. You can also reduce administration overhead in managing order distribution and vendor responses.

With OOCL Logistics' Purchas Order Distribution you can:

- Dispatch order and requirement specifications to supply chain partners
- Enable supply chain partners to enquire and respond to the purchase order
- Control access of order information for different partners
- Access purchase order response
- All purchase orders can be managed, regardless of whether the related shipments are managed by OOCL Logistics or not

No software installation is required - your vendors can use VendorPodium, our online vendor connectivity system, to enquire about and download their purchase orders. Very user friendly, VendorPodium allows your vendors to receive, accept and discuss their purchase order with your buyers. At the same time, your buyers can capture and dispatch purchase orders and track vendor acceptance and communication using MyPodium.

With Purchase Order Distribution, all these advantages are available in one place. All purchase order information is kept online for customer downloads and enquires anytime, anywhere.

Speak with your OOCL Logistics sales representative about benefits and pricing for Purchase Order Distribution.
