

Payment Audit

Every dollar counts

OOCL Logistics' Payment Audit ensures that you pay only for the transportation services you have received, in compliance with your freight contract. It allows you to save time and resources, is easy to use, and gives total visibility when checking the validity of your carrier bill. With Payment Audit, you can check details on every field audited. This unique product will also tell customers what has been validated and how it has been done, and is fully customized to your needs. The product, which supports both OOCL Logistics and external shipments, checks the below on your bills:

- Duplication of invoice
- Accessorial charges
- Use of correct tariff, classification and discounts
- Origin and destination accuracy

Key features of Payment Audit include:

- Customizable audit policy setting on audit items
- Zoom into the audit result to illustrate every un-matched charge item
- Visibility in the entire process, from invoice receipt, audit, discrepancy resolution
- Measurement of your carriers' invoicing quality
- Invoice Image, Data Storage and Retrieval

Payment Audit benefits:

- Full visibility in the audit process
- Zero capital investment
- Save costs incurred by errors and duplications
- Accuracy of auditing is higher, faster and more systematic than the manual process of the accountant
- Allows pre-audit and post audit functions

Using OOCL Logistics' Rate Table Setup, you can repeatedly audit many invoices. OOCL Logistics customers can get the larger logistics picture with details about which charge item has gone wrong, with an accurate calculated amount and explanation. You can also determine what kind of data should be verified and audited.
