

VendorPodium

Makes Global Vendor Management a Reality

As your sourcing and purchase order processes grow in complexity, it becomes ever more important that you keep real-time contact with vendors. Wouldn't it be even better if that real-time contact was integrated with your purchase order, supply chain visibility and management tools?

VendorPodium makes Global Vendor Management and Control an affordable reality for you today.

VendorPodium provides you and your Global Vendor Network the perfect platform to maintain two-way Connectivity and control over your suppliers, integrated directly with the MyPodium purchase order, inventory and supply chain management functions. From negotiations with vendors to confirming purchase-order status, bookings made and documents submitted - VendorPodium gives you access to your supplier world.

OOCL Logistics' VendorPodium has the kinds of vendor-friendly functions that will have your suppliers ready and willing to benefit by using the system too. Your vendors' savings in administrative costs and time will help make their products even more price competitive.

Benefits and features:

- Timely updated information on your vendors' product, manufacturing and shipment status provides global real-time upstream visibility
- Purchase-driven, rule-based guidance of vendor operations helps solve problems before they become delivery delays
- On-line vendor management of origin shipping documentation and processes helps ensure operational consistency and removes bottlenecks
