

ePacking List

Automation of time consuming and costly tasks

OOCL Logistics has demonstrated our leadership in information technology and innovative solutions with the launch of ePacking List, a new product offered to OOCL Logistics customers. ePacking List is one of a range of new products showcasing OOCL Logistics' strengths in vendor management.

ePacking List gathers packing list data and documents from global suppliers in an electronic standardized format, and gives customers a detailed account of the cargo being packed and delivered at-a-glance.

With ePacking List, customers can:

- Auto screen the packing list to identify inconsistencies among export documents
- Track missing information and manage changes
- Analyze e-Packing List data report for further distribution
- Enquire about Packing List data and documents online - anytime anywhere

ePacking List offers the following advantages:

- Saves costs - reduces clearance costs
- Reduces administration overload
- Ensures timely collection of Packing List data and documents
- Makes information available earlier in the supply chain
- Minimal effort, maximum accuracy

This product offers OOCL Logistics customers a unique advantage in their supply chain, ePacking List can be easily tailored for different destination warehouses, it ensures quality and consistency with other export documents, and its standardized format allows easy reading and reference.

Data can be collected earlier, which saves costs and minimizes administration overload.

With the advantage of OOCL's unique VendorPodium system, suppliers can create a Packing List with purchase order and shipment data. The Packing List document can be generated in PDF format and shared with the supplier online. VendorPodium offers capabilities in Purchase order Communication and Work in Progress Tracking, as well as shipment booking.

With ePacking List and VendorPodium, global vendor management and full control become a reality!

ePacking List is a PODIUM® product. Contact your local sales representative today for more details.
